

Second TUG/Seneca Student Achievement Award Winner Announced

The Toronto Users Group for System i is pleased to announce **Juliet Mathew** as the second winner of its TUG/Seneca Student Achievement Award. Juliet graduated with her iSeries Business Application Developer certification this semester, earning a 3.9 grade point average.

Along with a subscription to the TUG magazine, she will be invited to future member meetings and conferences.

Juliet Mathew has been selected as the top graduate with the iSeries Business Application Developer specialization from all the students who graduated in the spring of 2007 from the School of Computer Studies at Seneca College. How did she arrive at this point in her life?

After researching several options, Juliet decided to attend Seneca College based on its solid reputation. Her findings were that it was the largest college in Canada and the best in Computer science. It also didn't hurt that many of her friends were recommending the CPA program to her. After six semesters, she graduated from the CPAC program in spring 2007 with a 3.9 grade point average and two specializations. Her transcript shows she was successful in the subjects required for the Database Development and the iSeries Business Application Developer specializations. Juliet was also able to finish three Co-op work terms in between the six semester required to complete her diploma.

In Juliet's opinion, she received extensive training from highly professional faculty. Her first introduction to the iSeries was a third semester COBOL subject. After selecting and completing an iSeries Java option course called "Business Programming Using Java" in her fourth semester, she decided that she liked the platform and opted to take RPG and an advanced Database subject that were delivered on the System i. All of her option subject selections qualified her to achieve

the iSeries Business Application Developer specialization offered by the School of Computer Studies.

Juliet likes to put 100% effort into anything she does and feels that is the formula for success. Before coming to Seneca she was able to complete a Bachelor of Science degree at Mahatma Gandhi University in India. Her hobbies include gardening, listening to music and spending time with family and friends. More importantly, she sees

herself as someone who likes to help those that are in need.

Juliet is currently looking for an IT position and hopefully someone in the iSeries community will be interested in a student that has a great academic record, relevant work experience and exhibits a positive attitude.

Congratulations on your award Juliet! We look forward to seeing you at the next TUG meeting in September. 

Juliet Mathew
